## OUR BREWERIES

**EDMUND'S OAST  
BREWING CO**

# THE BEERS OF AMERICA

# AMERICAN BEERS

**For too long, the perception of American beer has been overshadowed by its mass-market offerings—beers that are rightly criticised for their lack of flavour and character. However, this overlooks the vibrant world of American craft beer, where the United States continues to stand as a world leader alongside renowned brewing nations in Europe.**

**American breweries have helped revolutionise the craft beer industry and are successfully challenging old stereotypes. They are redefining what beer can be, using quality ingredients and pioneering techniques that push the boundaries of brewing. And we believe these beers should be shared with the world.**

**As we bring these fantastic American craft beers to the UK, we aim to shift perceptions and highlight the true craftsmanship that the US brewing scene has to offer, celebrating its rightful place on the world stage of beers.**
